**Subject:** Spot Report Information

SAS,

We received a call from Jordan Nelms, NIMAT E1 Planning assigned to the Houston City EOC reporting the below listed information.

The Arkema Plant near the border of Harris County and Liberty County has reported an incident involving the buildup of pressure and an increase in temperature at their peroxide related facility. Local and county agencies are responding and have initiated the implementation of protective measures. It was reported that in the event that an explosion occurs, there would be a 1.5 mile blast radius. No further information is available at this time.

Note that the above is being submitted to your Section for the issuance of a Spot Report in follow up to a discussion between Steve Turcott and David Rivas.

Thank you for your assistance.

Respectfully,  
Bryan
